2nd World Congress on Reproductive Medicine and Health

“Management of reproductive problems- Novel approaches in improving or maintaining reproductive health”
After the overwhelming success of 1st edition of Reproductive Medicine which was held in Kuala Lumpur, Malaysia during March 12-14, 2018, we are proudly announcing the 2nd Edition of Reproductive Medicine during November 04 - 05, 2019 at Porto, Portugal.

The theme for the joint annual conference is ‘Management of reproductive problems- Novel approaches in improving or maintaining reproductive health’ featuring scientific program of high profile, scientific international and local speakers, with a wide range of concurrent sessions focusing on specialist areas of reproductive medicine and biology. Assisted reproductive technologies are about achieving the highest success rates. For many patients, the way in which their dream is fulfilled is another very important determinant of success.

On behalf of the committee we would like to extend a warm welcome to join us for the 2nd edition of Reproductive Medicine and Health at Porto, Portugal.

To add on for the scientific program, we have invited many distinguished international and national speakers who will undoubtedly stimulate vigorous debate at the meeting by sharing their knowledge and latest research.

Of course, as a conference destination Porto needs no introduction. Porto is a coastal city in northwest Portugal known for its stately bridges and port wine production. In the medieval Ribeira (riverside) district, narrow cobbled streets wind past merchants’ houses and cafes. And then there is of course the best coffee in the country!

It will be a delight to welcome you all in Porto in November 2019. Make sure to book mark your calendar!
The U.S. fertility market is estimated to be between $3 to 4 billion, comprising of fertility medications and assisted reproductive technology ("ART") services.

- The fertility pharmaceutical sector, estimated to be $1.5bn in the U.S., primarily consists of drugs that induce ovulation.
- ART services include fertility treatments involving the handling eggs and sperm.
- This segment is estimated to be ~$1.7 to 2.5bn.
- ART services include fertility medication, intrauterine insemination ("IUI"), reproductive surgery (e.g. fallopian tube obstruction, varicocele repair), and surrogacy, with in-vitro fertilization ("IVF") being the most popular.
- The demand for fertility services and drugs is forecasted to grow approximately 4% for the next several years primarily driven by the following key growth drivers:  - Aging and Infertility  - Increasing Prevalence of Obesity  - Cultural Shifts

Day-3-  Nov 06, 2019

Post Conference Tour : Porto
The scope of Human Reproduction covers the clinical science and medical aspects of reproduction, including: reproductive tract physiology and pathology, gonad function and gametogenesis, fertilization, embryo development, implantation and early pregnancy.

The Importance of Reproductive Health

“Adolescents are too often left out of policy planning and service delivery. More focus needs to be placed on providing learning and preparation for the world of work, building healthy lifestyles that reduce noncommunicable diseases and improve sexual health, and protecting adolescents from involvement in violence.” Source- UNICEF.

Reproductive health is not just about sex. It is part of a holistic health program starting from early age teaching values and understanding the anatomy and physiology of their bodies. This education continues when they are young adults to have safe and acceptable access to methods of fertility regulation of their choice and the right to have access to appropriate healthcare services that enables women to go safely through pregnancy and childbirth as stated in the WHO definition.
The Reproductive Medicine Conferences mainly focuses on overall management of reproductive problems by diagnosis, prevention and treatments involving recent innovations. It also deals with comprehensive gynecological care.

The target audience for Reproductive Medicine Conferences are researchers, practitioners and educators from the related field as gynecologists, obstetricians, nurses, midwives, clinicians, healthcare professionals from academia and delegates from healthcare sectors. It also includes breast cancer surgeons and gynecologic oncologists.
*Offering 20% discount to Women Participants as a special appreciation to Women in Medicine.

The fee is non-refundable in all circumstances. The registration fee includes admission to the conference, lunch and tea for the conference days, souvenir and conference kit for the participants it doesn't include travel or accommodations.

In case of joint authorship with two or more authors, all authors have to compulsory register for the award of certificate, participation in conference and kits including proceedings.

There is no concession on more than one authorship. In case of joint authorship of research fellow with guide, both the authors have to compulsory register for the award of certificate, participation in conference and kits including proceedings.
